## Asia

*Equities in Asia were higher today as the US Congress passed a bill to temporarily avert the fiscal cliff (Hang Seng: +2.9%). Stock markets in Japan and mainland China are closed for the holidays and will reopen on Friday.*

### China's December PMI points to ongoing recovery

China's official NBS PMI, released yesterday, remained unchanged at 50.6 in December (BBVA: 50.9; consensus: 51.0), marking the third consecutive month of expansion in manufacturing. By components, output (52.0) and new orders (51.2) continue to lead the recovery, while raw material inventory (47.3), employment (49.0), and supplier delivery time (48.8) still lag behind. Meanwhile, new export orders fell slightly to 50.0 from 50.2, as global headwinds pose the biggest risk to the economy. In a separate data release on Monday, the private sector HSBC PMI surprisingly rose to 51.5 from 50.5. Taken together, the outturns are in line with our view that the economy is strengthening gradually on domestic demand, boding well for our projections of about 8.0% growth in 2013 from 7.6% in 2012.

### Exports unexpectedly decline in South Korea; inflation slows

Exports in South Korea declined in December for the first time in three months by -5.5% y/y (consensus: +0.8%) from a 3.8% rise one month earlier, according to data released yesterday. Authorities pointed to seasonal factors as the cause of the weak reading in December's exports. Korean authorities recently took measures to curb won appreciation, which is probably weighing on exports performance. In a separate report, inflation in Korea edged down to 1.5% y/y from 1.6% y/y in November, giving room for the Bank of Korea to ease monetary policy in its next meeting on January 11.

### Singapore avoids recession

Singapore's economy grew by +1.8% q/q saar in the fourth quarter of 2012, (consensus: +1.6%) after a revised -6.3% q/q saar contraction the previous quarter, avoiding a technical recession and bringing full-year growth to 1.2% from 4.9% in 2011. A rebound in the services sector more than offset a decline in manufacturing, which contracted at a faster pace than the previous quarter. The positive outturn in the last quarter comes despite the Monetary Authority of Singapore refraining from easing policy in its meeting in October. Singapore's PM recently reiterated the government's forecast of 1-3% growth in 2013.

### India's Manufacturing PMI rises to six month high in December

Signaling a revival in factory activity, India's December manufacturing PMI touched a six month high of 54.7 (vs 53.7 in November), driven by strong gains in new orders on an improving domestic and external demand outlook. Meanwhile, input as well as output prices eased slightly in December. Moderating inflationary pressures leaves room for the Reserve Bank of India to lower interest rates at its January 29th meeting, where we expect a 25 bps cut in the repo rate.

### Briefly noted:

- **Indonesia's inflation remained unchanged at 4.3% y/y in December**, slightly higher than expected (consensus: 4.2%), while core inflation was also flat at 4.4%. The planned increases in electricity tariffs and the minimum wage, however, may put upward pressure on prices in 2013. Separately, exports continued declining in November (-4.6% y/y; consensus: -4.2%), although at a slower pace than in previous months (October: -7.6%).
