### JOLTS Report Shows Job Vacancies at Highest Rate Since August 2008

The Job Openings and Labor Turnover Survey (JOLTS) for September hints at gradual improvements in the labor market as the economy gets back on track for recovery. After a weak report in August, the number of job openings jumped to 3.4mn in September, the highest since August 2008, marking a 38% increase since the end of the recession in June 2009. On a seasonally-adjusted basis, most industries and regions experienced an increase in vacancies. A rise in separations could be partially responsible for the significant increase in job openings, with an increase in the number of quits as more employees feel comfortable with the prospect of finding other positions. The number of layoffs and discharges has returned to pre-recession levels, suggesting that businesses may be reaching the end of planned job cuts as a primary cost-cutting strategy. Given that the report is lagged, this data appears to be good foreshadowing for declines in the unemployment rate, which fell slightly to 9.0% in October. The question remains whether businesses are willing to boost hiring enough to push unemployment even lower. The good news is that hiring rates have increased slightly over the past few months, with levels slowly approaching the 5.0mn mark listed when the recession began in January 2008. The response of hiring to the job openings rate will also be instructive of structural unemployment.

### Global Slowdowns Less Troublesome for the US Trade Balance in September

Despite expectations for weaker external demand, the trade gap improved to -\$43.1bn from a revised -\$44.9 billion in August, mostly due to a 1.4% rise in exports. Much of the demand for exports came from the goods side, as service exports declined for the first time in six months. In addition, flight-to-safety attitudes stemming from the European debt crisis led to a rise in gold exports. Imports also increased in September but at a slower pace than exports, up 0.3% following three months of declines. The petroleum balance widened for the second consecutive month, partially offsetting improvements in the nonpetroleum goods gap. While imports of industrial supplies and autos also increased, declines in capital and consumer goods suggest that businesses remain pessimistic about economic prospects and are likely holding back on these goods until demand conditions improve. Overall, trade data for September is good news for Q3 GDP and reduces concerns regarding downward revisions to the advance estimate.

## Week Ahead

### Retail Sales, Ex. Auto (October, Tuesday 8:30 ET)

Forecast: 0.4%, 0.3%	Consensus: 0.3%, 0.2%	Previous: 1.1%, 0.6%
----------------------	-----------------------	----------------------

Retail sales are expected to increase in October for the fifth consecutive month as consumer activity recovers. A rise in auto sales likely drove headline retail volume for the month, although the gain reflected fewer expensive truck sales compared to the previous report. While weather issues may have been a concern in some regions, Halloween-related sales likely boosted the ex-auto figure at month's end. In general, retail sales are expected to be softer than in September but should continue growing as we approach the holiday shopping season.

### Consumer Price Index, Core (October, Wednesday 8:30 ET)

Forecast: 0.1%, 0.1%	Consensus: 0.0%, 0.1%	Previous: 0.3%, 0.1%
----------------------	-----------------------	----------------------

High food and energy prices have exerted pressure on headline inflation throughout the past few months, however, we expect this trend to moderate in October. Price pressures are slowing, with declines in both import and export prices. While some oil and other commodity prices increased in October, others declined slightly. Furthermore, slowing demand conditions have eased both input and output prices in the manufacturing sector. Core inflation is also slowing in line with Fed expectations for more stable prices in the coming months.

### Industrial Production (October, Wednesday 9:15 ET)

Forecast: 0.2%	Consensus: 0.4%	Previous: 0.2%
----------------	-----------------	----------------

Industrial production is expected to expand again in October due in large part to increasing production in the auto sector. Manufacturing conditions are finally beginning to turn around, with reports of increased shipments and new orders. Although nondurable goods production has declined slightly throughout the past few months, the durable goods component continues to hold strong. The industrial production index is slowly approaching levels seen before the crisis began in 2008, and we expect this trend to continue as the economic recovery gains momentum.

### Housing Starts (October, Thursday 8:30 ET)

Forecast: 630K	Consensus: 606K	Previous: 658K
----------------	-----------------	----------------

Increasing demand for multifamily homes led to a better-than-expected jump in housing starts in September, yet levels remain at only one-quarter of the pre-recession peak. While the latest homebuilder outlook suggests sizeable improvement in the residential market, demand does not appear to be rebounding quickly enough to absorb the additional supply of homes. Furthermore, weakness in building permit issuance could indicate a decline in new home starts for October. Thus, we expect housing starts to be slower than September but remain above the low levels seen throughout the summer months.

### Market Impact

This week's indicators should cause little anxiety in the market given that much of the economic focus remains tied to Europe. While it is not yet clear that the US is safe from troubled waters, continued growth in production and retail sales should confirm that the recovery is gaining momentum. Furthermore, moderating price pressures should ease worries for both consumers and producers.

## DISCLAIMER

This document and the information, opinions, estimates and recommendations expressed herein, have been prepared by Banco Bilbao Vizcaya Argentaria, S.A. (hereinafter called "BBVA") to provide its customers with general information regarding the date of issue of the report and are subject to changes without prior notice. BBVA is not liable for giving notice of such changes or for updating the contents hereof.

This document and its contents do not constitute an offer, invitation or solicitation to purchase or subscribe to any securities or other instruments, or to undertake or divest investments. Neither shall this document nor its contents form the basis of any contract, commitment or decision of any kind.

Investors who have access to this document should be aware that the securities, instruments or investments to which it refers may not be appropriate for them due to their specific investment goals, financial positions or risk profiles, as these have not been taken into account to prepare this report. Therefore, investors should make their own investment decisions considering the said circumstances and obtaining such specialized advice as may be necessary. The contents of this document is based upon information available to the public that has been obtained from sources considered to be reliable. However, such information has not been independently verified by BBVA and therefore no warranty, either express or implicit, is given regarding its accuracy, integrity or correctness. BBVA accepts no liability of any type for any direct or indirect losses arising from the use of the document or its contents. Investors should note that the past performance of securities or instruments or the historical results of investments do not guarantee future performance.

The market prices of securities or instruments or the results of investments could fluctuate against the interests of investors. Investors should be aware that they could even face a loss of their investment. Transactions in futures, options and securities or high-yield securities can involve high risks and are not appropriate for every investor. Indeed, in the case of some investments, the potential losses may exceed the amount of initial investment and, in such circumstances, investors may be required to pay more money to support those losses. Thus, before undertaking any transaction with these instruments, investors should be aware of their operation, as well as the rights, liabilities and risks implied by the same and the underlying stocks. Investors should also be aware that secondary markets for the said instruments may be limited or even not exist.

BBVA or any of its affiliates, as well as their respective executives and employees, may have a position in any of the securities or instruments referred to, directly or indirectly, in this document, or in any other related thereto; they may trade for their own account or for third-party account in those securities, provide consulting or other services to the issuer of the aforementioned securities or instruments or to companies related thereto or to their shareholders, executives or employees, or may have interests or perform transactions in those securities or instruments or related investments before or after the publication of this report, to the extent permitted by the applicable law.

BBVA or any of its affiliates' salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to its clients that reflect opinions that are contrary to the opinions expressed herein. Furthermore, BBVA or any of its affiliates' proprietary trading and investing businesses may make investment decisions that are inconsistent with the recommendations expressed herein. No part of this document may be (i) copied, photocopied or duplicated by any other form or means (ii) redistributed or (iii) quoted, without the prior written consent of BBVA. No part of this report may be copied, conveyed, distributed or furnished to any person or entity in any country (or persons or entities in the same) in which its distribution is prohibited by law. Failure to comply with these restrictions may breach the laws of the relevant jurisdiction.

In the United Kingdom, this document is directed only at persons who (i) have professional experience in matters relating to investments falling within article 19(5) of the financial services and markets act 2000 (financial promotion) order 2005 (as amended, the "financial promotion order"), (ii) are persons falling within article 49(2) (a) to (d) ("high net worth companies, unincorporated associations, etc.") Of the financial promotion order, or (iii) are persons to whom an invitation or inducement to engage in investment activity (within the meaning of section 21 of the financial services and markets act 2000) may otherwise lawfully be communicated (all such persons together being referred to as "relevant persons"). This document is directed only at relevant persons and must not be acted on or relied on by persons who are not relevant persons. Any investment or investment activity to which this document relates is available only to relevant persons and will be engaged in only with relevant persons. The remuneration system concerning the analyst/s author/s of this report is based on multiple criteria, including the revenues obtained by BBVA and, indirectly, the results of BBVA Group in the fiscal year, which, in turn, include the results generated by the investment banking business; nevertheless, they do not receive any remuneration based on revenues from any specific transaction in investment banking.
