**Asia** 

India's central bank left interest rates unchanged today (see below). The decision was not a surprise after yesterday's higher-than-expected inflation outturn of 7.0% y/y (consensus: 6.7%) and ahead of tomorrow's release of the 20012/13 central government budget. We still expect the RBI to be one of the most aggressive central banks in cutting interest rates during the course of the year, although we sense that the region's central banks are becoming more cautious in light of inflationary pressure from rising oil prices.

### India leaves policy rates unchanged due to inflation risks

The Reserve Bank of India (RBI) left interest rates unchanged today at 8.5%, following last Friday's cut in the cash reserve ratio by 75bps. The RBI reiterated that that policy rates have peaked, but did not provide views on the timing or magnitude of future rate cuts: "Recent growth-inflation dynamics have prompted the Reserve Bank to indicate that no further tightening is required and that future actions will be towards lowering the rates. However, notwithstanding the deceleration in growth, inflation risks remain, which will influence both the timing and magnitude of future rate actions. which remains dependent upon the path of inflation, and the government's efforts towards fiscal consolidation."

In a separate pre-budget release, the Indian Finance Minister presented the Economic Survey for 2011-12 which projects GDP growth of 6.9% y/y in FY12 (in line with our expectations) and 7.6% y/y and 8.6% y/y in FY13 and FY14 respectively (BBVA forecasts are 7.3% and 7.6% y/y respectively). The focus now shifts to tomorrow's Union Budget.

### Briefly noted:

- Singapore private-home sales rise sharply. Private-home sales in Singapore hit a 2 ½ year high in February, rising by 29% from the previous month to 2,413 units. The outturn, which came in spite of new measures to stunt property-market growth, could be a harbinger of renewed asset bubble pressures in the months ahead.
- Indonesia prepares for fuel price hikes, but may delay electricity tariff increases
  according to news reports today in Jakarta. Agreement appears to have been
  reached between the government and key Parliamentary leaders on a fuel price
  increase on April 1, but not on a simultaneous electricity tariff adjustment due to
  opposition from lawmakers and street protests.
- Thailand's January exports fell sharply by -6.0% y/y (consensus: 0.0%), after a decline of -2.0% y/y the previous month. The decline was largely due to the manufacturing sector (-13.5% y/y), with electronics (-27.1%) in particular falling sharply as multinational supply chains continue to experience heavy disruptions due to the flooding last year.

### Indicator of the Week

### Singapore: CPI Inflation for February (March 23)

Forecast: 5.0% y/y Consensus: n/a Prior: 4.8% y/y

The inflation outturn will be closely watched ahead of the Monetary Authority of Singapore's next semi-annual policy meeting, scheduled for mid-April. Inflation moderated in January after hovering above 5% y/y since June. Despite the recent increase in oil prices, the authorities have officially kept their 2012 inflation forecast of between 2.5%-3.5% y/y. A high inflation outturn would make the MAS more likely to stay on hold at the April policy meeting by leaving the current slope (estimated at 1%) and center of its exchange rate band unchanged. The recent improvement in the global environment also makes it less likely that the MAS will ease policy, despite the ongoing slowdown in Singapore's growth momentum. We expect inflation will remain elevated during the first half of the year, before moderating in the second half (BBVA Forecast: 3.0% y/y for 2012).
