### Asia

Expectations are growing of further monetary easing in China through cuts in required reserve ratios following remarks by PBoC officials reported in the media. While investors kept a nervous eye on developments in Europe, prospects of policy easing in China were enough to send the Hang Seng index up by 1.0%, although markets in the rest of the region finished in mixed territory.

### Japan's exports accelerate in March, as BoJ hints at further policy easing

Exports growth exceeded expectations (5.9% y/y vs. consensus: 0.2%), boosted by auto sales to the US, and resulting in a lower-than-expected trade deficit. Imports grew by 10.5% y/y for the month due to higher oil and gas purchases needed to replace Japan's dwindling nuclear power supply. Additionally, on Wednesday, Bank of Japan Governor Masaaki Shirakawa expressed the central bank's intention to continue monetary easing. This increases the likelihood of additional quantitative easing at the BoJ's next policy meeting on April 27<sup>th</sup>.

### Hong Kong's unemployment rate stays unchanged at 3.4%

Hong Kong's seasonally adjusted unemployment rate was unchanged in the January - March period (consensus: 3.5%). The outturn reflects continued strong demand for labor, although the market remains vulnerable to external headwinds given Hong Kong's dependence on the export sector. We expect the unemployment rate to inch up in the coming months.

### Briefly noted:

- The Philippines kept interest rates unchanged today, citing improving growth prospects. The decision was in line with expectations, and rates remain at 4.00% following consecutive 25bps cuts at its two previous policy meetings. Positive market sentiment continues to build in the Philippines, where the stock market touched a record high yesterday, before declining by 0.3% today, to 5,173.
- India's trade balance widens in FY 2012. Provisional data on India's full year trade was released today, showing that exports rose by 21.0% y/y while imports rose 32.1% y/y. While the export outturn exceeded the government's 20% annual growth target, the widening trade deficit (USD 184.9 bn in FY12) adds to concern about the current account deficit for the coming year, which has led to downward pressure on the rupee.
