EAGLEs

Hong Kong,
 Second Quarter 2012
Economic Analysis

Activity	2 →
External sector	4 →
Consumer Prices	5 →
Monetary Policy	6 →
Domestic Credits	7 →
Financial Markets	8 →
Special Topic	11 →
Statistical Annex	12 →

- Recent activity indicators in most of the EAGLEs show lower than expected marks.** In Asia, both Industrial production and retail sales continued below trend and moderating; recent Chinese industrial production, PMI and GDP figures disappointed. Meanwhile, Latam EAGLEs show mixed results, with Brazil underperforming but Mexico maintaining a positive momentum. European EAGLEs show also diverging trends, with Turkey driving to a soft landing but Russia still showing robust activity indicators but moderating.
- External balance maintained stable despite global economic slowdown.** Commodity abundant economies are still benefiting from high terms of trade, while the other EAGLEs have compensated the decline in external demand by reducing their imports.
- Inflation has eased in the EAGLEs** as commodity prices and lagged effects of monetary tightening took their toll. In Turkey inflation remained high.
- Most of the Central Banks have maintained a cautious monetary stance except for Brazil** where policy makers are delivering a front loaded monetary easing. **The margin for further monetary stimulus is still wide which helps to maintain our soft landing scenario.**
- Credit growth moderated** in most of the EAGLEs due to lagged effects from last year monetary tightening and softening demand.
- Exchange rates have been recently under depreciation pressures** resulting from the recent increase in Global Risk Aversion reflected in capital flows redirection to safe havens.

Activity: GDP

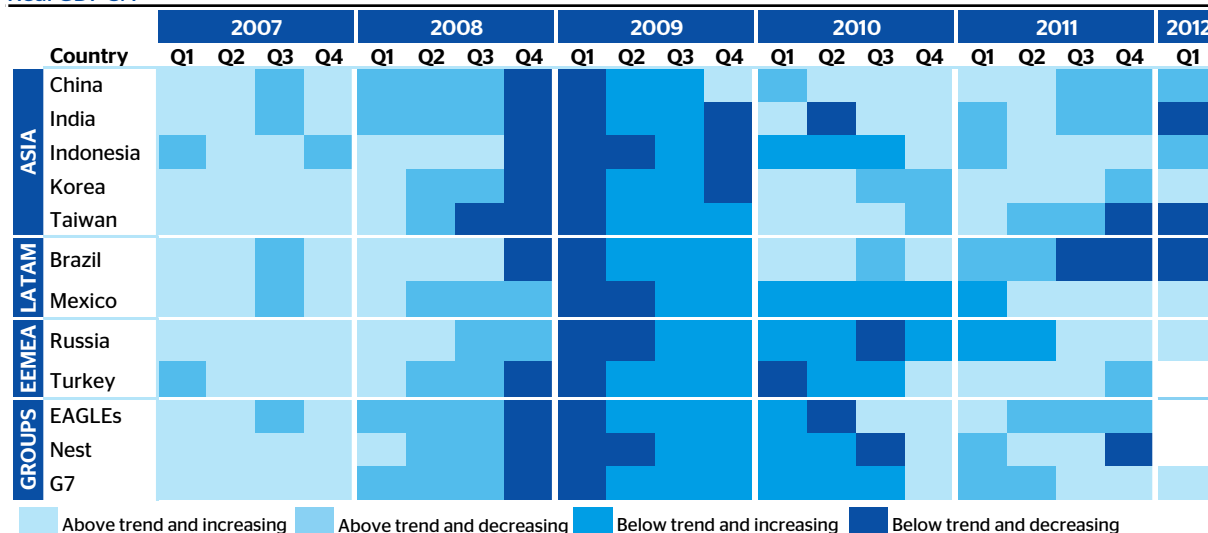

- Recent activity indicators in most of the EAGLEs show lower than expected marks. In Asia, industrial production and retail sales continue to be below trend and moderating. India continue to underperform while China recent activity indicators have softened.
- In Latam, EAGLEs show mixed results. In Brazil, industrial production is still weak but retail sales keeps positive. In any case, the 1Q-12 GDP growth figure disappointed. This contrasts with Mexico, where both high frequency and GDP growth still remain positive.
- European EAGLEs show also diverging trends, with Turkey driving to a soft landing but maintaining higher than expected activity growth. Russia still shows robust activity indicators but moderating.

 Note: Turkey: Registered Motor Vehicles (Units) (2003AY=100)
 Source: BBVA Research, Haver and CEIC

- Industrial production is losing momentum in export oriented economies specially in Asia. The negative outcome is also the result of domestic structural issues in some countries such as Brazil and India. On the other hand, Mexico is the exception and has benefited from the recovery process in the US, its most important export market.
- Retail sales in Asia have weakened. This probably reflects a mix of factors, including a more risk averse behavior by households. In Brazil domestic consumption remains strong due to supportive factors such as the very low unemployment rate, the recent increase in the minimum wage and the decline in inflation.

External Sector: Current Account & Trade Balance

- Despite the global slowdown, external balance has not changed dramatically in the EAGLEs. India and Turkey are still the economies with the largest external deficit. In Turkey, the correction of the current account deficit is underway, although still at a moderate pace.
- Commodity abundant economies, like Indonesia, Brazil and Russia continue benefiting from high commodity prices while China, Korea and Taiwan maintained their trade surplus.

Current Account as % of GDP (accumulated for the last 4 quarters)

Consumer Prices: Headline & Core Inflation

- Inflation eased in the EAGLEs, except in Turkey where expectations remained well above year-end target. Softening demand pressures, a better performance of exchange rates during the Q1 and more favorable energy prices are supporting the reduction in inflation.
- Commodity prices have cooled down allowing a decline in food and fuel prices. Demand inflationary pressures have eased, as showed by the core inflation indicators, while economic growth is moderating.
- However, the recent exchange rate depreciation could bring some upward pressure on prices, in particular in India and Turkey, although the significant recent drop in energy prices will provide some buffer.

Monetary Policy: Reference & Real Interest Rates

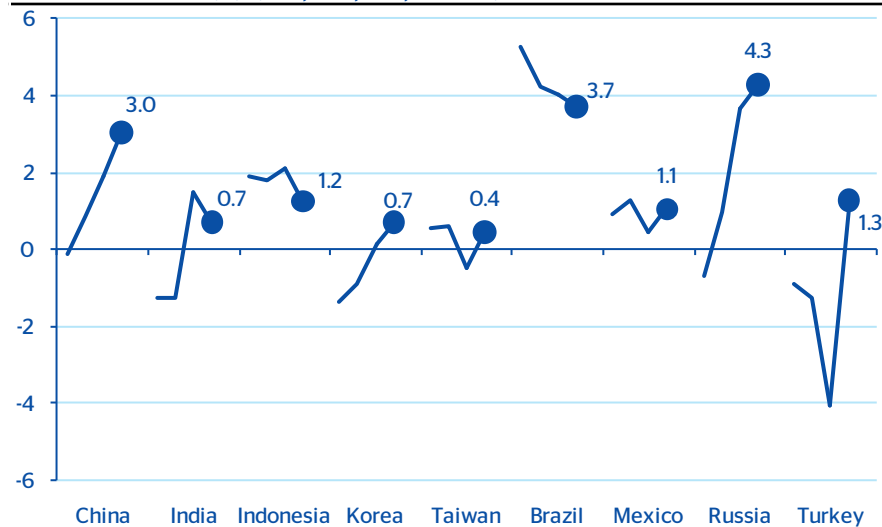

- Most of the Central Banks of the EAGLEs have maintained a cautious monetary approach keeping their reference interest rates, while fine-tuning the monetary policy stance using of other macro-prudential tools such as reserve requirement ratio.
- Central Banks from India and Indonesia have cut moderately their reference rates while in Brazil the policy makers are delivering a front loaded monetary policy easing, including non conventional tools, aiming to foster economic growth. The rest of Central Banks maintain a wait and see attitude, except In Turkey where the Central Bank still stands with a tightening bias.

Central Bank Reference Rates (%): (-9m, -6m, -3m, Current)

Real Interest Rates (%): (-9m, -6m, -3m, Current)

Source: BBVA Research and Haver

Domestic Credits: Lending

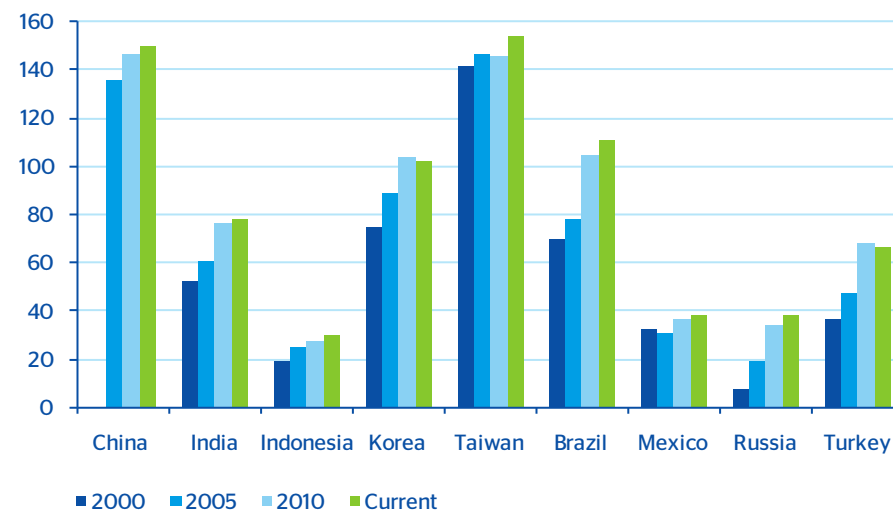

- In most of the EAGLEs credit growth is easing due to lagged effects of monetary policy including last year’s interest rate increases and changes in reserve requirements.
- Strong credit growth in Russia explains the good performance of personal consumption expenditure but increase its vulnerability. The expected credit growth moderation in Turkey is already in place.

Domestic Credits YoY percentage point change: (2Q11, 3Q11, 4Q11, 1Q12)

Note: Lack of data for India, Korea and Russia in 1Q 2012

Domestic Credits as % of GDP

Note: Lack of data for China in the year 2000
Source: BBVA Research and Haver

Financial Markets: Stock Markets, Equity & Bond Flows

- The global rise in risk aversion explains the stock markets underperformance in the EAGLEs, with the exception of Mexico and Indonesia.
- Despite the higher economic growth and positive outlook in the EAGLEs and Nest economies, capital flows have recently reversed towards safe havens in some developed countries.

Equity and Bond flows:
Standardized units for the 2007-2011 period (over 4-week average data)

Source: BBVA Research and EPFR

Financial Markets: Nominal & Effective Exchange Rates

- Exchange rates have been under depreciation pressures given the reverse of capital inflows in particular, in Brazil and India where the Rupiah reached minimum record levels given its large external imbalance and structural concerns.
- The RMB has remained stable, hence it has become the currency among the EAGLEs with the largest real appreciation in the last year. Also last April the PBoC widened the daily traded band against the US dollar. Turkey's exchange rate continue to be more stable than last year.
- The recent strong nominal depreciation has not been fully transmitted yet to the real exchange rate.

FX Returns (%) (data available up to June 1st)

Financial Markets: Risk Premiums & Sovereign Credit Ratings

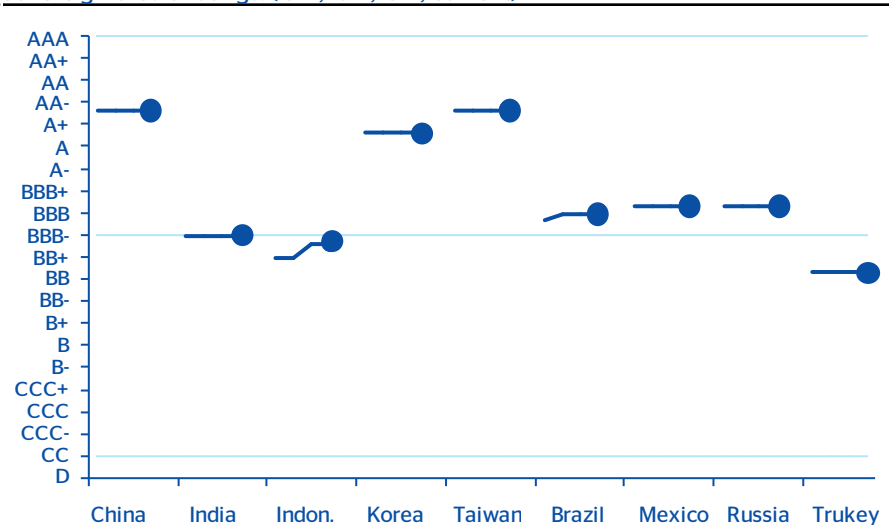

- Risk premiums among the EAGLEs have been pushed up by global concerns but they have not risen dramatically showing up a positive differentiation in the global capital markets.
- Credit ratings have not changed but India’s outlook was revised to “negative” given its twin deficits and delays in its reform process. On the other hand, the expected upgrade of Indonesia to “investment grade” has been delayed by a credit rating agency due to recent deterioration in Indonesia’s domestic policy environment.

5 Year CDS (bp): (-9m, -6m, -3m, Current)

Sovereign Credit Ratings: (-9m, -6m, -3m, Current)

Note: For each country a simple average is calculated from ratings done by Moody's, S&P and Fitch after converting them into a numerical scale from 0 ('D') to 20 (AAA)
Source: BBVA Research and Bloomberg

Special Topic: Demographic transition in the EAGLEs

- A persistent and significant expansion of working age population has been a supportive factor in the EAGLEs for decades, but this started to fade away during this decade, especially for China, Korea and Taiwan, while it is already stagnant in Russia since the 90s.
- EAGLEs need to compensate for demographic changes and keep high growth records. Countries must boost productivity and increase capital contribution to keep high potential growth. From the labor side, there is still margin to increase participation rates and enhance labor markets reforms to reduce structural unemployment.
- Demographics are still a premium for many countries, but too rapid population growth remains one of the most important challenges, as it requires an important amount of job creation. EAGLEs, however, are far from Egypt's worst case scenario in terms of social unrest.

DISCLAIMER

This document and the information, opinions, estimates and recommendations expressed herein, have been prepared by Banco Bilbao Vizcaya Argentaria, S.A. (hereinafter called "BBVA") to provide its customers with general information regarding the date of issue of the report and are subject to changes without prior notice. BBVA is not liable for giving notice of such changes or for updating the contents hereof.

This document and its contents do not constitute an offer, invitation or solicitation to purchase or subscribe to any securities or other instruments, or to undertake or divest investments. Neither shall this document nor its contents form the basis of any contract, commitment or decision of any kind.

Investors who have access to this document should be aware that the securities, instruments or investments to which it refers may not be appropriate for them due to their specific investment goals, financial positions or risk profiles, as these have not been taken into account to prepare this report. Therefore, investors should make their own investment decisions considering the said circumstances and obtaining such specialized advice as may be necessary. The contents of this document is based upon information available to the public that has been obtained from sources considered to be reliable. However, such information has not been independently verified by BBVA and therefore no warranty, either express or implicit, is given regarding its accuracy, integrity or correctness. BBVA accepts no liability of any type for any direct or indirect losses arising from the use of the document or its contents. Investors should note that the past performance of securities or instruments or the historical results of investments do not guarantee future performance.

The market prices of securities or instruments or the results of investments could fluctuate against the interests of investors. Investors should be aware that they could even face a loss of their investment. Transactions in futures, options and securities or high-yield securities can involve high risks and are not appropriate for every investor. Indeed, in the case of some investments, the potential losses may exceed the amount of initial investment and, in such circumstances, investors may be required to pay more money to support those losses. Thus, before undertaking any transaction with these instruments, investors should be aware of their operation, as well as the rights, liabilities and risks implied by the same and the underlying stocks. Investors should also be aware that secondary markets for the said instruments may be limited or even not exist.

BBVA or any of its affiliates, as well as their respective executives and employees, may have a position in any of the securities or instruments referred to, directly or indirectly, in this document, or in any other related thereto; they may trade for their own account or for third-party account in those securities, provide consulting or other services to the issuer of the aforementioned securities or instruments or to companies related thereto or to their shareholders, executives or employees, or may have interests or perform transactions in those securities or instruments or related investments before or after the publication of this report, to the extent permitted by the applicable law.

BBVA or any of its affiliates' salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to its clients that reflect opinions that are contrary to the opinions expressed herein. Furthermore, BBVA or any of its affiliates' proprietary trading and investing businesses may make investment decisions that are inconsistent with the recommendations expressed herein. No part of this document may be (i) copied, photocopied or duplicated by any other form or means (ii) redistributed or (iii) quoted, without the prior written consent of BBVA. No part of this report may be copied, conveyed, distributed or furnished to any person or entity in any country (or persons or entities in the same) in which its distribution is prohibited by law. Failure to comply with these restrictions may breach the laws of the relevant jurisdiction.

In the United Kingdom, this document is directed only at persons who (i) have professional experience in matters relating to investments falling within article 19(5) of the financial services and markets act 2000 (financial promotion) order 2005 (as amended, the "financial promotion order"), (ii) are persons falling within article 49(2) (a) to (d) ("high net worth companies, unincorporated associations, etc.") Of the financial promotion order, or (iii) are persons to whom an invitation or inducement to engage in investment activity (within the meaning of section 21 of the financial services and markets act 2000) may otherwise lawfully be communicated (all such persons together being referred to as "relevant persons"). This document is directed only at relevant persons and must not be acted on or relied on by persons who are not relevant persons. Any investment or investment activity to which this document relates is available only to relevant persons and will be engaged in only with relevant persons. The remuneration system concerning the analyst/s author/s of this report is based on multiple criteria, including the revenues obtained by BBVA and, indirectly, the results of BBVA Group in the fiscal year, which, in turn, include the results generated by the investment banking business; nevertheless, they do not receive any remuneration based on revenues from any specific transaction in investment banking.

BBVA is not a member of the FINRA and is not subject to the rules of disclosure affecting such members.

"BBVA is subject to the BBVA Group Code of Conduct for Security Market Operations which, among other regulations, includes rules to prevent and avoid conflicts of interests with the ratings given, including information barriers. The BBVA Group Code of Conduct for Security Market Operations is available for reference at the following web site: www.bbva.com / Corporate Governance".

BBVA is a bank supervised by the Bank of Spain and by Spain's Stock Exchange Commission (CNMV), registered with the Bank of Spain with number 0182.
