## Asia

*Despite improving sentiment in Europe, investors remained bearish in Asia on continued concerns about a slowdown in China. While June trade data released today in China showed that exports held up better than expected (see below), weaker imports reinforced market concerns of a slowdown in domestic demand.*

### China's trade surplus widens on weak imports, sending out mixed signals

China's trade data for June revealed that exports held up better than expected (11.3% y/y, consensus: 10.6% y/y), but that import growth weakened (6.3% y/y, consensus: 11.0% y/y), resulting in a widening trade surplus to US\$31.7 billion, the highest since January 2009. Underlying the export outturn is a continuing trend of weak demand from the EU (-1.1% y/y) and Japan (0.1% y/y), with still-strong demand from emerging Asia (18.6% y/y) and the US (10.6% y/y). Meanwhile, the sluggish import outturn probably reflects the combined effect of weaker commodity demand and prices, as well as softer processing imports due to weakening export orders. While the data were not well received by the market, we believe that, taken together, the June outturns provide some comfort that external demand has not yet weakened too sharply.

### Philippines exports rise strongly

The Philippines reported May exports today which came in well above expectations (19.7% y/y, consensus: 6.5% y/y). Intraregional demand was the key factor behind the strong performance, as shipments to China and Japan rose sharply. Strong economic momentum in the Philippines has caused authorities to tighten rules on capital inflows last week, as the Philippines peso has been Asia's strongest performing currency against the US dollar thus far this year.

### EU, China conclude two-day EU-China Strategic Dialogue

China also continued to enhance its international presence – it concluded two days of talks at the EU-China Strategic Dialogue by expressing confidence that the EU will solve its crisis, and reiterated its ongoing support for the region. The high-level meetings at the EU-China Strategic Dialogue, an annual event, are designed to increase “understanding, trust and cooperation between Europe and China” through discussions about how to strengthen bilateral relationships (in trade, investment, defense, etc.) as well as about current global conditions.

### Briefly noted:

- **China cuts fuel prices again, providing a boost to domestic consumption**  
China's NDRC announced a cut in the price of retail gasoline (by 420 RMB/ton) and diesel prices (by 400 RMB/ton), the third round of cuts in 2012 thus far, reflecting the recent decrease in international fuel prices.

## Indicator of the Week

### China: GDP for Q2 (July 13)

Forecast: 7.4% y/y

Consensus: 7.8% y/y

Prior: 8.1% y/y

China's Q2 GDP outturn will be watched in order to gauge the extent of the ongoing growth slowdown. Recent high frequency indicators such as PMI and industrial production have been somewhat weaker-than-expected, prompting downward revisions to the growth outlook. We currently expect Q2 GDP growth to have weakened to 7.4% y/y from 8.1% in Q1. Nevertheless, we expect growth momentum to pick up during the rest of the year on supportive fiscal and monetary policies—including further cuts in the RRR and interest rates—leading to full-year GDP growth of around 8%, although the outlook is, admittedly, subject to downside risks due to the weak external environment. In addition to GDP, a number of important monthly indicators will also be released next week, including industrial production, investment, retail sales, and credit aggregates.
