

US Weekly Flash

Highlights

• Fed Announces QE3 and Extends Policy Guidance

- Despite the fact that recent macroeconomic data were not a dead giveaway for QE3, the Fed decided to move forward with additional easing in order to stimulate the economy. As expected, this round of quantitative easing will be slightly different than the previous two rounds, with plans to purchase \$40bn per month of mortgage-backed securities (MBS) on an open-ended basis (i.e. until we see substantial improvement in labor market conditions given that inflation is under control). The FOMC also decided to continue Operation Twist as scheduled through the end of the year. Ultimately, both policy accommodations will increase long-term securities holdings by about \$85bn per month until the end of 2012. In addition, the FOMC announced an extension of their policy guidance. The committee expects that "exceptionally low levels for the federal funds rate are likely to be warranted at least through mid-2015" rather than late-2014 as announced in the previous meeting.
- The FOMC also released its Summary of Economic Projections. In general, committee members downgraded growth forecasts for 2012 but upgraded the outlook for 2013. Compared to our own baseline scenario, we continue to see a more optimistic outlook from the Fed.
- In the Chairman's press conference, Bernanke made it clear that the Fed's highly accommodative stance will be appropriate even as economic growth picks up. The FOMC is committed to promoting a stronger recovery and will be careful not to prematurely tighten monetary policy in order to give some time to the economy to show steady growth. Prior rounds of quantitative easing have been effective in helping economic growth, yet monetary policy cannot solve the problem on its own. As in previous communications, Bernanke highlighted the need to address the fiscal cliff while simultaneously focusing on long-term fiscal sustainability. For more details, see our latest [Fed Watch](#).

• CPI Jumps 0.6% in August and Overshadows Gain in Retail Sales

- The consumer price index increased 0.6% in August following 4 months of flat and negative readings. As expected, rising gas prices were a primary driver of headline inflation, jumping 9.0%, the strongest increase in more than 3 years. Total energy prices increased 5.6% for the first time since March. Food inflation also accelerated to 0.2% growth for the month, and we expect that this trend will continue as we see the more prolonged impact from the Midwest drought. Core inflation was much more modest, increasing only 0.1% for the second consecutive month and was driven mostly by shelter and medical care services.
- Unfortunately, this rise in inflation overshadows the retail sales gain for August. Total retail sales increased 0.9% for the month following a revised 0.6% increase in July, while the ex-auto figure rose 0.8%. However, most of the nominal gains were due to the rise in gas prices, with sales at gasoline stations up 5.5%. Thus, real retail sales grew at a more modest pace, up only 0.3% in August. On the bright side, we have seen positive spending data so far for 3Q12, which points to a slightly stronger PCE contribution to real GDP growth for the quarter.

Week Ahead

Empire State Manufacturing Survey (September, Monday 8:30 ET)

Forecast: -4.00

Consensus: -2.00

Previous: -5.85

Manufacturing data has been anything but encouraging lately, with most indicators suggesting contracting activity. In August, the Empire State Index dropped below zero for the first time since October, reflecting persistent declines in the new orders component. Surprisingly, weak orders have yet to influence a drop in shipments, but we expect that this trend will not last if demand does not rebound soon. Similarly, employment gains in the sector will continue to decelerate if production remains subdued. Ultimately, we do not expect to see a significant rebound in the data throughout the next few months.

Housing Starts and Building Permits (August, Wednesday 8:30 ET)

Forecast: 760K, 800K

Consensus: 765K, 795K

Previous: 746K, 812K

Housing starts and building permits are both volatile data series and permits usually lead starts by a few months or so. In general, both series are moving in a positive direction. In July, housing starts declined slightly after a big gain in the previous month, while building permits jumped to the highest level of the recovery by far. We expect that both figures will change only slightly in August, with July's gain in permits pointing to an increase in new home starts for the month. Despite recent deterioration in consumer confidence and future income prospects, the rising homebuilder confidence index points to continued improvements in housing activity for the months ahead.

Existing Home Sales (August, Wednesday 10:00 ET)

Forecast: 4.57M

Consensus: 4.55M

Previous: 4.47M

Existing home sales are expected to increase in August to slightly higher levels than seen in the previous two months. Rising home prices have been discouraging homebuyers, however the brief relief in prices in July helped to reverse this trend. July's increase in pending home sales, which is a leading indicator of existing sales, will likely be reflected in final housing activity for August. However, existing sales will remain limited by falling supply, with the share of distressed properties dwindling. We expect that housing demand will continue to improve gradually while growing on a YoY basis.

Initial Jobless Claims (September, Thursday 8:30 ET)

Forecast: 375K

Consensus: 373K

Previous: 382K

Initial jobless claims have not shown much improvement in the past few weeks, with the 4-week moving average hovering above 370K. For the second week in September, claims jumped to 382K, the highest level since mid-July. The latest consumer confidence report noted a decline in the number of respondents stating that jobs are plentiful, but also reflected a drop in those who feel that jobs are hard to get. On the downside, the 6-month outlook for the labor market was worse than in previous months. Given the uncertain outlook for future activity, it is unlikely that we will see a significant decline in initial claims through the rest of the year.

Market Impact

Markets should be less volatile this week given the latest announcement from the Fed. However, it may take a while before we begin to see an impact on economic data. In particular, manufacturing data remains weak and another month of negative indicators could increase market anxiety. On a brighter note, housing activity has been gradually improving and thus should warrant little reaction from markets.

Quote of the Week

Ben S. Bernanke, Chairman of the Federal Reserve
Press Conference Following FOMC Announcement
13 September 2012

"The committee is concerned that, without further policy accommodation, economic growth might not be strong enough to generate sustained improvement in labor market conditions. We're looking for ongoing, sustained improvement in the labor market. There's not a specific number we have in mind. What we've seen in the last six months isn't it."

DISCLAIMER

This document and the information, opinions, estimates and recommendations expressed herein, have been prepared by Banco Bilbao Vizcaya Argentaria, S.A. (hereinafter called "BBVA") to provide its customers with general information regarding the date of issue of the report and are subject to changes without prior notice. BBVA is not liable for giving notice of such changes or for updating the contents hereof.

This document and its contents do not constitute an offer, invitation or solicitation to purchase or subscribe to any securities or other instruments, or to undertake or divest investments. Neither shall this document nor its contents form the basis of any contract, commitment or decision of any kind.

Investors who have access to this document should be aware that the securities, instruments or investments to which it refers may not be appropriate for them due to their specific investment goals, financial positions or risk profiles, as these have not been taken into account to prepare this report. Therefore, investors should make their own investment decisions considering the said circumstances and obtaining such specialized advice as may be necessary. The contents of this document is based upon information available to the public that has been obtained from sources considered to be reliable. However, such information has not been independently verified by BBVA and therefore no warranty, either express or implicit, is given regarding its accuracy, integrity or correctness. BBVA accepts no liability of any type for any direct or indirect losses arising from the use of the document or its contents. Investors should note that the past performance of securities or instruments or the historical results of investments do not guarantee future performance.

The market prices of securities or instruments or the results of investments could fluctuate against the interests of investors. Investors should be aware that they could even face a loss of their investment. Transactions in futures, options and securities or high-yield securities can involve high risks and are not appropriate for every investor. Indeed, in the case of some investments, the potential losses may exceed the amount of initial investment and, in such circumstances, investors may be required to pay more money to support those losses. Thus, before undertaking any transaction with these instruments, investors should be aware of their operation, as well as the rights, liabilities and risks implied by the same and the underlying stocks. Investors should also be aware that secondary markets for the said instruments may be limited or even not exist.

BBVA or any of its affiliates, as well as their respective executives and employees, may have a position in any of the securities or instruments referred to, directly or indirectly, in this document, or in any other related thereto; they may trade for their own account or for third-party account in those securities, provide consulting or other services to the issuer of the aforementioned securities or instruments or to companies related thereto or to their shareholders, executives or employees, or may have interests or perform transactions in those securities or instruments or related investments before or after the publication of this report, to the extent permitted by the applicable law.

BBVA or any of its affiliates' salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to its clients that reflect opinions that are contrary to the opinions expressed herein. Furthermore, BBVA or any of its affiliates' proprietary trading and investing businesses may make investment decisions that are inconsistent with the recommendations expressed herein. No part of this document may be (i) copied, photocopied or duplicated by any other form or means (ii) redistributed or (iii) quoted, without the prior written consent of BBVA. No part of this report may be copied, conveyed, distributed or furnished to any person or entity in any country (or persons or entities in the same) in which its distribution is prohibited by law. Failure to comply with these restrictions may breach the laws of the relevant jurisdiction.

In the United Kingdom, this document is directed only at persons who (i) have professional experience in matters relating to investments falling within article 19(5) of the financial services and markets act 2000 (financial promotion) order 2005 (as amended, the "financial promotion order"), (ii) are persons falling within article 49(2) (a) to (d) ("high net worth companies, unincorporated associations, etc.") Of the financial promotion order, or (iii) are persons to whom an invitation or inducement to engage in investment activity (within the meaning of section 21 of the financial services and markets act 2000) may otherwise lawfully be communicated (all such persons together being referred to as "relevant persons"). This document is directed only at relevant persons and must not be acted on or relied on by persons who are not relevant persons. Any investment or investment activity to which this document relates is available only to relevant persons and will be engaged in only with relevant persons. The remuneration system concerning the analyst/s author/s of this report is based on multiple criteria, including the revenues obtained by BBVA and, indirectly, the results of BBVA Group in the fiscal year, which, in turn, include the results generated by the investment banking business; nevertheless, they do not receive any remuneration based on revenues from any specific transaction in investment banking.
