## Asia

### China's flash manufacturing PMI shows signs of a rebound

China's HSBC/Markit flash manufacturing PMI for September rebounded slightly from the previous month (47.8), suggesting that growth, while still weak, may be stabilizing. The outturn was generally viewed as a negative by markets (the Shanghai was down today by 2.1%), although the stabilization in the number is probably good news for the growth outlook. The final HSBC/Market PMI outturn will be released on September 29<sup>th</sup>, followed by the more comprehensive official PMI on October 1<sup>st</sup>. Separately, it is also being reported that the Ministry of Commerce is discussing new policies to stabilize growth in the export sector, which may be introduced by the central government before a national holiday that begins on October 1<sup>st</sup>.

### Taiwan export orders improve, and the central bank leaves rates on hold

Taiwan's export orders for August declined by -1.5% y/y (consensus: -1.9%, BBVA: -1.5%), exactly in line with our expectations (see Weekly Indicator) and an improvement from -4.4% y/y in July. Encouragingly, orders from China (including Hong Kong) increased by 2.5% y/y, after five consecutive months of contraction. Demand from ASEAN countries also contributed to the improvement. That said, European orders (-8.4% y/y) remained the major drag on Taiwan's overall performance.

Also today, Taiwan's central bank left its benchmark rate unchanged at its quarterly monetary policy meeting, as expected. Inflation has increased notably to 3.4% y/y in August, with food prices affected by extreme weather conditions, leaving inflation above the government's comfort zone of 2.0%. Another factor supporting the central bank's decision to leave rates on hold was the Fed's recent QE3 announcement, which may boost capital inflows to emerging economies, further intensifying concerns about inflationary pressures over the remainder of this year.

### Japan's exports fall as economy remains under pressure

Meanwhile, Japan's exports declined by -5.8% y/y (consensus: -7.3% y/y) in August, further evidence showing the economy has paused due to the global downturn and the strong yen. Notably, exports to China fell by 10% y/y - China, accounting for 20% of Japan's total exports, is Japan's biggest trade partner. The recent flare-up in tensions between China and Japan over disputed islands further raises concerns regarding Japan's exports outlook. In light of these headwinds, we expect Japan's growth to stall in the second half of the year.

### Briefly noted:

Hong Kong's inflation eased in August to 3.7% y/y (consensus: 3.9%) from 4.2% y/y in July (after netting out the effect of a one-off government rental subsidy). Without the adjustment to last month's inflation, there was actually a pickup in year-on-year terms from 1.6%. We expect inflation to remain at around this level through the rest of the year.

## Indicator of the Week

### Taiwan Export Orders for August (September 20<sup>th</sup>)

Forecast: -1.5% y/y

Consensus: -2.0% y/y

Prior: -4.4% y/y

As a forward indicator for near-term export prospects in the region, Taiwan's export orders will be watched to gauge the extent of the ongoing slump in global trade. The economy's export performance has been very weak in the past two months, as manufacturing PMI dropped to a nine month low (46.1 in August). The recent slowdown in China's economy, as evidenced by sluggish activity and trade, has further intensified concerns about Taiwan's export outlook. We expect year-on-year growth of export orders continue to decline in August, albeit at a slower pace. Orders from major export partners might show some signs of stabilization, although a meaningful recovery has yet to come.
