### India stands committed on reforms

In the face of stiff political resistance, the Indian government today formally approved its recently announced investment reforms, including the opening of the multi-brand retail sector to foreign investment (see Monday's *India Flash* for details). To further encourage capital inflows, the authorities today also lowered the withholding tax on foreign borrowings by Indian companies to 5% from 20% through June 2015. Announcement of further investor-friendly reforms are reportedly in the offing, as early as next week. The government's stepped-up resolve to accelerate long-awaited reforms boosted domestic equities, which were big outperformers today (+2.2%, to the highest level this year), led by banking stocks. Meanwhile, the Indian rupee appreciated by more than 1.7% against the US dollar, to 53.5/USD.

### HKMA issues upbeat stability report, but cites risks of rising property prices

The Hong Kong Monetary Authority (HKMA) issued today its latest Half-Yearly Monetary and Financial Stability Report ([click here](#)). On the positive side, the report notes that the Hong Kong dollar has benefited this year from safe-haven capital inflows in the midst of the uncertain external environment (consistently trading near the strong end of the 7.75-7.85 per USD currency band), that credit growth has slowed to more healthy levels compared to a year ago, that banks' profitability has risen due to wider interest margins, and that liquidity remains strong. Furthermore, while overall economic growth is slowing, unemployment remains low and stable, in a range of 3.2%-3.4%. On key risks to the outlook, however, the report cites the local property market as a "major risk to financial stability," as tight supply conditions and low interest rates continue exerting upward pressure on prices, which could reverse quickly in the event of financial shocks. Property prices have increased by over 13% this year, and affordability ratios have deteriorated. Just last week in the wake of the Fed's QE3 announcement, the HKMA adopted a fifth new round of macro prudential measures to cool the property market.

### Jakarta election outcome spurs hope of improved governance in Indonesia

According to exit polls, challenger Joko Widodo has defeated incumbent Fauzi Bowo to become the new Governor of Jakarta on October 4, a post of national prominence given Jakarta's large population and economic size. Enthusiasm for Mr. Widodo stems from his proven track record as mayor of Solo, in central Java. The new Governor will have his work cut out for him, however, in trying to fulfill his promises of improving the city's services and inadequate infrastructure, especially by building a Mass Rapid Transit system, which Jakarta's traffic-plagued residents desperately need. If successful, Widodo could set the tone for improved governance in Indonesia and, though still a long-shot, it is not out of the question that he could become a contender for the Presidential election in 2014.

## Indicator of the Week

### Singapore CPI for August (September 24<sup>th</sup>)

Forecast: 3.7% y/y

Consensus: 3.8% y/y

Prior: 4.0% y/y

Singapore's inflation has been stubbornly high in comparison to most other Asian economies, at around 5% y/y for most of 2012. However, it fell in July to 4.0% y/y on a combination of weakening demand and base effects. This month's outturn will be especially important, as it will be the last print before the next semi-annual policy meeting of the Monetary Authority of Singapore (MAS) in mid-October. Given the continued weakness in external and domestic demand, we expect the MAS to ease policy by slowing the appreciation path of the currency (the main instrument of monetary policy). However, the Fed's recent new round of QE may give the MAS some pause, as more capital inflows are likely, which could lead to asset bubbles in the property market and a pickup in inflation.
