Korea holds rates, as expected...

The Bank of Korea (BOK) left interest rates unchanged at 2.75% at its meeting today, as expected, six days ahead of the Presidential Election on December 19th. The BOK has cut rates twice this year for a combined 50 bps, the last time in October. In its statement, the BOK noted that the economy is still weak primarily due to sluggish domestic demand, and that the negative output gap is unlikely to close soon, while "inflation will remain low for the time being". On the other hand, the BOK mentions the favorable trends in exports and employment. The BOK also cites the appreciation in the won –which has strengthened by more than 8% against the USD in 2012, the top performing currency in Asia– and ends the statement saying that they will "closely monitor external risk factors and the consequent changes in financial and economic conditions" in order to conduct monetary policy. Looking forward, we expect the BOK to remain on hold in the coming months.

...while the Philippines also keeps rates unchanged at record-low of 3.5%

The Philippines also held the benchmark interest rate unchanged at 3.5% today (consensus: 3.5%) after cutting to the current record-low level in the last meeting in October and a total of 100 bps in cuts in 2012. The third quarter GDP data released two weeks ago surprised to the upside, as the Philippines is showing robust growth momentum on "strong domestic demand and buoyant business sentiment", according to the central bank's statement. Proactive government spending and aggressive monetary easing are also acting in support of the economy. The central bank therefore judged its current monetary stance remains appropriate as the interest cuts continue to work its way through the economy, while inflation is expected to stay "manageable".

Briefly noted:

• The Hong Kong government agreed to increase the minimum hourly wages by 7%, effective since May 2013. The new threshold will apply to 10% of the city's labor force. Higher wages could also lead to more operating cost for the employers, in turn causing layoffs in related industries. The move may put upward pressure in inflation, already at 3.8% y/y (October).
