LatAm Daily | Vice-president Michel Temer to assume presidential duties today in Brazil

Enestor Dos Santos / Lorena Lechuga / Hugo Perea / Cecilia Posadas / Jorge Selaive / Carlos Serrano / Juana Téllez

At the beginning of the day in Brazil, the Senate will very likely admit for analysis the impeachment case, implying that President Rousseff will have to step aside. Meanwhile, retail sales contracted in March, adding a downward bias to our GDP forecasts. In Peru, we expect the CB to keep the MPR at its current 4.25% level in the monetary policy meeting to be held today.

Brazil - Retail sales contracted in March

Core retail sales decreased 0.9% MoM, while broad retail sales, which also consider vehicles and construction material, declined 1.1% MoM in March. These losses erased most of the gains observed in February (1.1% MoM in the core indicator and 1.4% MoM in the broad indicator). Moreover, they are in contrast with our expectations of stability for the period. Even though they are in line with our view that private consumption and overall activity will contract again in 1Q16, and somewhat less than in the previous quarters, they add a downward bias to our forecasts for the quarter (GDP: -0.6% QoQ; private consumption: -0.7% QoQ).

What to watch today

Brazil - Senate decision on the impeachment of President Rousseff

The Senate session to discuss and decide whether to admit the impeachment case, which started yesterday, will likely end this morning in Brazil. The most likely scenario is that the Senate will support the temporary dismissal of President Rousseff and that Vice-President Temer will assume presidential duties today. If this is confirmed, we could also see today the appointment of a new economic team.

Peru - Monetary policy meeting (May, 6.30p.m. NYT)

We expect the CB to keep the policy rate at its current 4.25% level. On the one hand, whilst it is true that YoY inflation rate remains above the target range, it has however been going down over the last few months, the inflation outlook is more benign going forward, and inflation expectations have also started to moderate. On the other hand, private domestic demand remains sluggish.
