## Market Comment | Muted impact on financial markets of French election results

Global Financial Markets Unit 08 May 2017

BBVA Research

- Financial markets started the week showing slight cautiousness despite the Macron victory in the second round of the French presidential elections (already priced in by markets after the first round): stock prices inched down, sovereign bond yields were little changed and the EUR depreciated signally after its recent sharp appreciation (see).
- China also remained in the spotlight as slightly disappointing import and export data (see) added to last week's weak PMI data for April (which hampered commodities prices). On the other hand, China's foreign reserves picked up for the third straight month, allaying concerns that they might be decreasing.
- The USD gained some ground as expectations of US reflationary policies were rekindled somewhat after the US House approved both the healthcare reform (see) and the Financial Choice Act. (Both reforms need approval from the US Senate). EM currencies suffered from the relative strength of the USD.
- **Oil prices swung between gains and losses**, as investors kept an eye on both increasing US oil production and the potential extension to cuts in OPEC oil production (see).
