

# Market Comment | European equity indices inch down on disappointing results and higher EUR

Global Financial Markets Unit 02 Aug 2017

- Financial markets continued steady once again, although a mild increase in equity volatility was perceived today, driven by mixed corporate results and the uncertainty about the US political agenda, adding some pressure on stocks. However, sovereign bond yields remained little changed.
- The EUR extended its gains, reaching January 2015 levels, as the USD remained under pressure due to uncertainty about the US political agenda. In addition, in a speech the Fed's Bullard opposed further Fed interest rate hikes (see), slightly dragging down interest rate hike prospects and adding downward pressure on the USD. On the other hand, the Fed's Mester supported a gradual tightening as she considered weak inflation a transitory factor (see). Moreover, ADP Nonfarm employment change in July (see) was weaker than expected, although previous data were revised upwards.
- Stocks declined across the board, especially in Europe. A stronger EUR weighed on European companies, along with disappointing corporate results among European banks, dragging down share prices. In the US, stocks inched down, after the encouraging results from Apple (see) boosted technology shares. Meanwhile, the Dow Jones is set to reach another record high.
- Oil prices declined after US crude oil inventories showed a smaller-than-expected decline. Nonetheless, EM currencies remained little changed, even though the USD was weaker.
