

Market Comment | Strong US job openings boost risk-on mood

Global Financial Markets Unit 08 Aug 2017

- Financial markets showed little change, amid a typical August low market liquidity, increasing the probability of a sudden movement taking place. That happened today after data showing a strong increase in US job openings were released.
- Before the release of the US labour data, financial markets had been steady, with China's sharperthan-expected slowdown in both imports and exports having a mild impact on commodity prices and cyclical sectors (see). Moreover, the fall in German exports (see) failed to weaken the euro, which opened the day above the USD 1.18 level, dragging down European equity markets for most of the day.
- However, the surge in US job openings (see) reversed the market trend. The implied probability of a Fed interest rate hike in December has increased to 45%, from 40% last Friday. The US dollar rallied, with the euro returning to levels below 1.18, boosting European equity markets, which reversed early losses. The movement also slightly spurred risk-on mood, with safe haven bonds declining, underperforming lower rated bonds, while both gold and the Japanese yen reversed early gains.
- The rally in the US dollar had a mute impact on EM currencies. Meanwhile, oil prices remained broadly steady, waiting for the meeting between OPEC and non-OPEC members.
