

## Market Comment | Mixed stocks and lower EUR

Global Financial Markets Unit 17 Jan 2018

- The positive tone continued in the US as stocks continued to drift higher despite some corporate
  earnings reports missing analysts' estimates (see). US Treasuries inched up, supported by hopes that
  House Republicans were close to agreeing a funding bill that would avoid the government shutdown until
  Feb. 16 (see). In addition, US industrial production was higher than expected, giving additional support to
  the USD.
- European sovereign yields remained almost unchanged after their recent rally, as did peripheral risk premiums. The Spanish sovereign yield did not react to the new developments in Catalonia (see).
   Meanwhile, equity indices dropped somewhat across Europe with a slight underperformance of the banking sector.
- In this context the **EUR continue dropping after reaching three-year highs**, as investors continued to mull over the timing of the ECB exit strategy (see), which gives some breathing space to the USD.
- Oil prices remained unchanged close to their highest level since 2014 (see) while other commodity
  prices declined. EM currencies were mixed and little changed, with the exception of the MXN which
  appreciated today ahead of NAFTA talks.
